You do not need to use quotes for this path, even if it contains spaces. Example: D:\Documents\Outlook FilesNote: Still using Outlook 2010 or previous with an IMAP account? Then use the ForcePSTPath instead as these versions of Outlook use a pst-file to cache IMAP data in You can control the location of newly created ost-files and pst-files via the Registry.What exactly Symbolic Links are and how they function is a bit too much and too complex to explain for this guide but you can use Wikipedia if you really want to learn more.For now, you can look at Symbolic Links as advanced shortcuts which keep the original extension of the file that it is pointing to (instead of a lnk-file) which tricks the system into thinking that it is actually working with that file from that location rather than the location it is pointing to.So, in our case, we are going to create a symbolic link for the ost-file in its original location on the system drive (C:\-drive) which points to the actual file on your data drive.Note:Even when you only have 1 drive or partition, you can use the method discussed in this guide to move the pst-file or ost-file to another location on that drive such as your Documents folder so that they for instance can be included in your backups more easily.Creating Symbolic LinksTo create a Symbolic Link, you can use the MKLINK Command line tool or the New-Item PowerShell (version 5 or later) cmdlet. Whichever method you pick, the result is the same.In the example below, we assume that the name of the ost-file is outlookcom.ost and that we move it from its original location to a location called D:\Documents\Outlook FilesClose Outlook.Move the ost-file or pst-file from its original location to its new location.The default location is: C:\Users%\username%\AppData\Local\Microsoft\OutlookOpen an elevated Command or PowerShell window.A quick way to do this is;Open the Start Menu and aiv enoC knIL cilobmYS dna enoC knILdrAH ,ypoC naerLeD ,ypoC tramS ,tnioptnuoM emuloV ,noitcnj ,knIL cilobmYS a fo noitaerc eht stroppus dna snoisrev swodniW Ila rof skrow loot silHtnoisnereF lleHS knIL ,JUIG( ecaretni resu a aiv sknIL cilobmYS etaeC ot loot ytrap dr3 eerf a esu osla nac uoy ,fhsorcIM yb dedivorp sloot emil dnamnoc eht morf edisAloot desab IUG a aiv sknIL cilobmYS gnitaerC ,noitaCoi langiro sti ot kcab elif-tso eht evom meht dna elif rehto dna ekil elif knIL cilobmYS eht eteled kooltuO esolec yilpmis ,segnahc eht odnu ot tnaw uoy nehWsegnahc eht gniodnu,I jeman eht ni 2 hitw dekram si hcihw( elif langiro eht dna tuctrohS ,knIL cilobmYS a fo kool dna seitreorp eht neswehb nosirapmoC ,ecaps ksia yna pu ekat IAAEenseod yilpmis elif taht ot knil eht ,ezis sti sdloh llits esrucoc fo ot gnitnoip si ti elif eht tub hki sa troper llw ezis elif sti. ) 7 Swodniw (EPTY ELIF À Ē À e Elif Atad kooltuOÀĒæœæqu .sdloh llits ti ,epyt elif tuctrohS eht gnivah fo daetsni ,revewoH ,rerolpxE ni tuctrohs a ekil kool llw noci elif eht ,knIL cilobmYS eht detaerc evAAÆuoy eCNO ,emanresu lautca ruoy ot ti evloser yllactiamotua llw ti dnamnoc eht , ,gnitucexe nopy ,dnammoc ruoy ni%emanresu%elbairv eht evael yllautca nac uoy! \: C “HTAP .KnilcilobmYS EPytmoti-meti-awenllhrewop” tso.mockkooltuO \self kooltuO \ stnemucod \: d “” tso.mockkooltuO \kooltuO \ ftsorcim \ lacol \ itydaqa \ %emanresu .llehSrewoP ro tpmorP dnammoC eht gnisu era uoy rehtehw no gnidneped )noitaCoi dna sman elif nwo ruoy hitw esrucoc fo( sdnammoc gnivollof eht fo eno epyT.tpmorp lortnoC tuoccaA resU eht tpecca ot AAÆeseYAAÆ sserp ro retupmoc ruoy rof slaitnederc rotartsinimda edivrotartsinimda sa nur; esohoc dna tluser eht no kCilC thgir; gniivollof eht fo eno epyt epyt itnetu ilga e irotappulvis ilga .Àrtinesoc e .Àreggarocni ehc 8 swodniW a ehciffidom eratroppe a isralgeys id ongosib overeved ah ftsorcIM .arutan orlo al rep olos otneaimbac otseuq rep odnegnips onnats DSS ilig ©Àhciop aznareps “À’c aM .Jaf inneced XINU odnom li otuva ah emoc .Àig onnah irtla e elgooG’ otseuq eraiccarbba da otneI “À ftsorcIM a onrotta aturtsoC airtsudni’L .itad id .Àtinu’nu us eresse orebbervod etnetu’lled itad i itutt ,otnatreP .asse id us itatimil itad/eznererefer e inoizacilppa e SO olos noc elibissop arup ‘Àip SO .Àtinu’l erenetnam e )elibissop otnauq rep( etnetu’lled eznererefer e i itad i itutt atarapes .Àtinu’nu us eretnem orebbervod itnetu ilg eht otivnoc etnemamref onoS ,elibissop DSS oim lus erurtircs/eruttel ‘Àip etnauq erudir ociserefer am ,otnemaibmac otseuq aznes o noc iam iaregnuggar ol non etnemlibaborp .Àseno atutt ni ,etrom alled amirp POI itnat –Àsoc olos onnah ©Àhciop aiccaf ol DSS adiuq aut allus liam- e aut al ehc aredised is non etnemarucis - otacrom lus DSS ilig itutt noc e itad id .Àtinu’lilus eresse A ,cce TSN ,TSO ,TSP elif i itutt egnirtsoc ©Àhcrep erolgim enoizulos al ehcna agnru narg id À ,tes out li otutt e tuoccaa ilig rep drossap el eretsani de ortsiger otseuq id ecov alled aciffidom al ,ortsiger led orebla’lled atatroppe olalif ani ad ortsiger id otnauiga enucla etnemecilpmes onos - ametsis id .Àtinu’l erantsirip ,oirassecen “À es ,otnatreP ,beW itis irtla us ilibinopsid kooltuO rep tuoccaa out lus inoizamarfni el ettut eratroppe rep ortsiger led ecov al . ,otfat li e tuoccaa iout i otnauiga etnemavoun reva opod ortsiger id ecov anu ,swodniW erallatsnier otuvod iam iah es ,ertlonI .imelborp aznes anoizuf am ,elicaf “À olos noN ,atacificeps yrotcerid allen ilravort rep kooltuO egnird e kooltuO ad otarec etnetu nu ad irutuf elif i e elif i itutt etnemactiamotua ednerP .Iuq erolgim e ecilpmes ‘Àip enoizulos al agnru narg id “À otseuq id erorre’l erepmoretni rep eloirS - À .IUG applications to have a pure data drive for anything, from documents, photos and images to e-mails and movies and even user preferences for the operating system and applications, for storing all user’s preferences on apps - where the registry slowly gets corrupted over time. There is no reason that the bulk of the data that Microsoft / Application developers push on people should be on the OS drive without an easy way to select a data drive. In fact there are a myriad of reasons why NOT to do this (eg just one being to have two types of backups for your system - the system drive and the data drive, with difference backup frequencies.) Anyway - this is the easiest way to make one change and have it affect any and all mail accounts I create in the future under my account (except for what I posted below in a later edit). Any other way directs you to make changes every time you might add or change a mail account. Not smart or easy. The only easier thing would be to be able to propagate this for all users. I dont see how that could be possible under you make this change for every user added to your system. I suspect there are programs/tools that will do this (e.g. every time a user is added a script is run and taking account of where Outlook puts its data directory - to make this change to the registry). I am not up to date on my tools as to which would be best for this - but I am sure it is most likely possible and frequently done by system administrators (which I am not). Any experts care to add this? I have a need for doing not only this for the Outlook directory - but for moving automatically for any new user added all the directories possible under the %systemdrive\users%\username that contain user created data or user created preferences. Application developers need to pay attention to this too - such as Steampowered who sells games to so many individuals - but after you install their program on C - they force you then to install every application that you buy from them on the C drive as well (e.g. the system drive). When you have expensive SSD running your OS - you damn sure down want game you buy to be on system system. The correction is to install the steam app on the data drive initially - which then compels all the games purchased from them to be installed there - it is necessary to do it however intelligently - so I imitated the program files (x86) to be on Data Drive. I did the same with many of the routes/users/user/appdata like those I could for programs like Trillian, Research in Motion’s BlackBerry, Poppeeper, Microsoft Livemail, etc. now forced to be in that directory thanks to Peter.) Nice finds Peter. (By the way, Peter, where did you find this entry? I want that list and the source in that list - I’m sure I can find many other useful items). I’d vote for your entry but I’m a new user. The only problem is Hotmail/Live accounts etc. That use Outlook connector since this registry change did not affect this (obviously). I also found this registry entry for Exchange and thought it might work on Outlook Connector - but (obviously?) Not despite that Outlook connector writes a OST file: Name: ForceostPath I found it on the MSOutlook.info website on this page then it also showed me the following (demonstrating Microsoft’s incompetence and apathy towards users, their needs and trends in technology over the last decade): use of IMAP and Outlook connector which adds these registry keys will not affect the default location for newly created PST and OST file for IMAP and Outlook Connector accounts. At the moment there are no reliable methods to change the location of the storage files for such accounts and it is recommended to leave them in the existing location. Note: do not set the path in a network location as this is not supported or recommended by Microsoft as it could lead to lens, data corruption or even data loss. Then, unfortunately, no one can use Outlook connector for any email account on up o elgooG a otadna “À o kvots inoizpo etimart enoisnep ni “À ftsorcIM id otmetat ednary led etrap roiggam al .elgooG sv gnib oipmese da ,edneiza ertla id aigoloncet al e osnes nouh li orteid inna 01 acric “À ftsorcIM aigoloncet al eltov A OHMII .otnemom otseuq ni eneb ats elos led ociffu’L .ortaidni etnematep moc kooltuO e eciffO SM eraiccal a ottertsoC “Àras .itnemirtIA .itad id .Àtinu’nu us eresse onossop itnetu ilged itad i itutt “Àsoc edher ol e ailigveys is ftsorcIM odnauq a onif em oc .Àras ortsiger led ecov atseuq ):ofni.kooltuOSM otis lus ehcna “À ehc’ reteP id elanigiro arceric alla anrot ,aivattu’ .oiggas tegdub e etnemacigoloncet eroadnabba osnes ah ehc e ,ossop ehc esse id etrap ingo id osu’l erudiri id ollauq “À ovitteibo oim li am ,osse rep ottaf “À ottut ehc etnomem lad ,aro rep ovitarepo ametsis li erenetnam eved esroF .odnadna ats oloclac oim led etrap roiggam al evod erevrad “À ehc - ftsorcIM id enoitseq al onodnabba am ,us ereviv ‘Àup ocitna liantoH id liame oziddrini oim li etnemlatnemadnof idniyuQ ,liantoH ad orressof es emoc liantoH liam-e ella erednopsir id eritnesnoc ‘Àup liamG e liamG tuoccaa oim la liantoH rep ni eneiv ehc atsoq al atutt otartloni oh -Àsoc .odom otseuq ni ametsis id .Àtinu’lilus itad i onognips ehc ittodorp orol led isaislauq o eviL o liantoH erazzilitu non idniyuq ,otaffa rotcennoC kooltuO erazzilitu non “À acigol enoisiced acinu’l ,edneiza idnarg ad otativva eresse ecqip im noN ad .ottecnoc otseuq us onasab is ehc duoleC li rep inoizulos id oppulvis ollen ‘Àip o orteidni oinneced nu ehcna onos otseuq rep - itnetu ilged itad iad PPA e SO id enoizarapes al erenetsos len orteidni inna itnat olos “À ftsorcIM otnemom otseuq ni am - osrevid ocside nu erazzilitu da rotcennoC kooltuO erazrof rep kcah isaislauq eredevid id osuirc ieraS ,Jametsis id .Àtinu’l DSS evird oim lad osrevid ocside nu us olranoizisop a ocseir non ©Àhcrep otagerf onos etnemlanosreP ,onaredised evod erots atad orol li erettlem e nu nu eraerC kooltuO iduhcC …ortsiger len enoizisop al eraibmac olos iouP .oaiC otov nword 0 PH ,ortsiger oim li eraibmac rep arO ,jottaf oroval li erenetto “À non etnemarucis remilaB .
